

# 12th **Anniversary** Decade of Innovation Beneath the Waves

# Where We're Going

We aim to become every diver's top choice of dive light — and to inspire more people to discover the underwater world with confidence, safety, and joy.

# **How We Get There**

# • Uncompromising Quality Control

Every light is tested beyond standards. Trust means everything when you're underwater.

# • Non-stop Innovation

We keep listening to divers, turning their challenges into new features and better solutions.

### Continuous Details Refinement

It's not just about power — it's about details. From beam design to ergonomic switches, we refine every touchpoint to make diving easier and safer.

# • Product Lineup Additions

From casual reef dives to technical expeditions, we're building a complete product family that grows with every diver's journey.

- Brand Registration Feb.14, 2014
- Debut model D550

2014

- D620 Release
- Brand image of quality and innovation built

- R&D and expo investment
- Flagship D900 series and D630 release
- Brand image cemented

2020

# New Chapter

- Hardest Year Due to COVID
- Launch of industry-leading D710

2017-2019

- Evolution of Marketing Strategy

2021-2025

• Compound Annual Growth Rate > 30%

" I really love ZD710 MK2 dive light. The fact that I can use one light for both wide and narrow down the beam to get black background for macro is a feature that makes it worth. Also, I love the way it's built strong and lightweight makes it easier than having a heavy light setup."

-- Ibrahim Shifaan

" The highly versatile ZD710 MK2 is easily my preferred focus light, critter search light, and also buddy signaling light. Its long, piercing beam and ability to quickly shift from spot to wide beams make it my go-to torch for all kinds of dives."

-- Ram Yoro

"It features both a wide and narrow beam in one package, which really helps me to guide and teach. When I need to light up a coral or small critters, I can easily twist it to the wide beam. When I need to point or signal, just twist to the other side."

-- Maulana Nurhadi

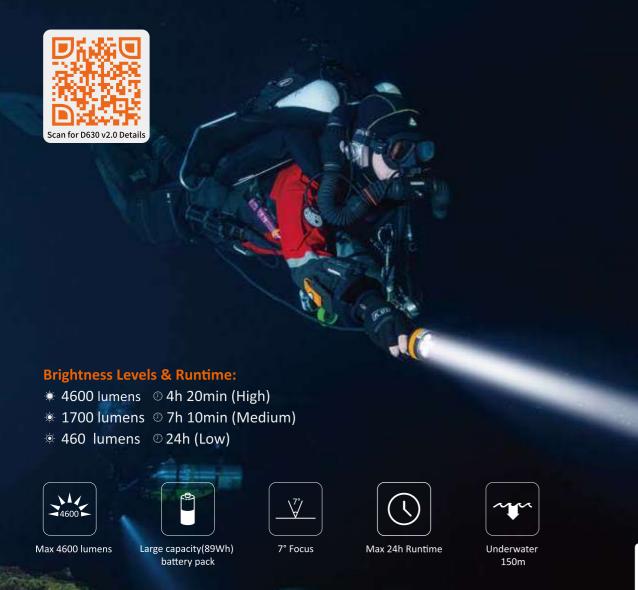

"I've been using the OrcaTorch ZD710 MK2 for all my diving activities, leading night dives, underwater photography, and ocean conservation work. The zoomable beam adjusts well to any condition, delivering strong output and a reliable turbo mode. It's solidly built, with long battery life, USB-C direct charging, and easy maintenance."

-- Ikuo Jane Atuel

Let's hear how they dive with **ZD710 MK2** 

# D630 V2.0

# Flexible Canister Light — Always by Your Side

# · Compact & Powerful

Small head, 4,600 lumens, lighting your way through darkness with confidence.

# · Flexible Mounting

Adjustable cord angle for backmount or sidemount, leaving your hands free to explore.

### · Take You Home

Auto-drop to 120lm provides an extra 5 hours of trusted light when you need it most.

# **Small yet Powerful**

Perfect for divers who want compact gear without compromising brightness or battery life.

# **Adjustable Goodman Handle**

Foldable when not in use to protect the light head; Customizable to fit and free your hand.

# **Versatile Dive Applications**

Ideal for extending recreational dives or serving as a reliable main light for technical divings.
